

## 1. Product Overview

This document presents the generic specification for the 41-channel 100GHz AWG MUX/DEMUX component supplied for use in DWDM system.

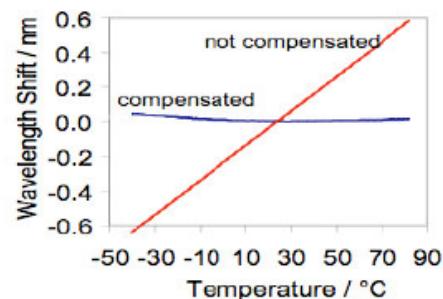

### Hiph's Dense Wavelength Division Mux/Demultiplexer

Modules are part of a series of high performance products based on silica-on-silicon planar technology and a unique athermal packaging design requiring no electrical power, software or temperature control for a completely passive DWDM solution. This product range offers a combination of very low loss and high channel isolation along with long term reliability and low cost per channel for 41 channel, 100GHz solutions. Each module can perform Mux and Demux functions.

Different input and output fibers, such as SM fibers, MM fibers and PM fiber can be selected to meet different applications.

**Passive Temperature Compensation**
